Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The usage of the term "hogging" in the pre-amendments was discussed to be vague and indefinite in meaning. Distinguishing between an application and a task was deemed to be important and recommended by examiner to include in the claim language. The notion of a command buffer was also mentioned and discussed as possible claim amendments. This would require further consideration and search. The language used to describe a method of using a modulated data signal were explained to be unclear as in what was performing the instructions. Applicant will consider this. The interview concluded.
